THE FIRST DESKTOP PRINTER TO SUPPORT BOTH RFID AND LINERLESS!

LINERLESS BAG TAG SUPPORTED

RFID

TK180 LINERLESS

BAGGAGE TAG AND ATB PRINTER WITH AUTOCUTTER AND LINERLESS CAPABILITY

Custom is now offering TK180 bag tag with linerless capability. Due to hygienic and protection reasons airport staff may wear gloves and it may be difficult peel-off standard bag tags; linerless bag tags facilitate the operations for all those customers who still prefer to use the traditional counters.

TK180 is an environment friendly product, with no paper waste at the autoload, and now the linerless version is even more eco-responsible: since it has no backing paper, it produces less waste when printed.

CUSTOM®
